

Cat Evaluation Book Age 13

Your cat's health is very important to a long and happy life with you. Any changes in their behavior or routines could help you notice changes in your cat and catch any possibly illnesses as they begin so that you can get your pet the medical attention it may need

Name five signs that your cat may be ill:

Most pet cats do not get enough exercise, so their diet is very important to maintain the best weight. For this reason, it is important to read the labels on the cat food to make sure that your cat is getting the proper nutrition it needs.

What range of calories does a kitten need per day? _____

About how many calories should an adult cat have per day? _____
